Nordby Construction celebrates 30 years of success in the North Bay construction industry this year under the leadership of Del Nordby and Craig Nordby—a new generation of owners within the family-operated business. Del and Craig take over from founder Wendell Nordby, who retired January 1st to pursue his many other community interests. Nordby Construction's existing experienced management team remains in place under the new owners.

Del and Craig have managed the business for the last five years, expanding the company's preconstruction services and its commercial construction arm. They have also significantly grown three other divisions, Nordby Signature Homes, Nordby Wine Caves and Nordby Professional Services.

Nordby Construction is widely known for the professionalism and thoroughness of its preconstruction services. The outstanding planning which takes place during the preconstruction process, along with Nordby Construction's ability to execute during construction, enables the company to bring projects in on schedule and on budget. Nordby's passionate group of skilled builders, both in the field and in the office, are excited about what they do and bring best practices and enthusiasm to every job.

Recent completed projects include the Marin Country Club, Sonoma County Humane Society, the Lanahan & Reilley LLP building, Venge Vineyards, and the Moore Building in downtown Santa Rosa.
